## EXPERIENCE

### TradeByte Software GmbH, Ansbach — Senior Software Developer

Dec 2018 - PRESENT

- Work in a project that breaks a legacy monolith product into microservices using the AWS cloud. Design different cost-optimized strategies for developing data pipelines between manufacturers and marketplaces.
- High-level work includes brainstorming feature requirements, designing the architecture.
- Low-level work includes developing code and tests, perform code reviews.
- Skills used: Python, Django, PostgreSQL, and AWS.

### Citrix R&D India, Bangalore — Senior Software Engineer I

Sep 2016 - Sep 2018

- I started my career at Citrix as Software Engineer 2 and got promoted to Senior Software Engineer I within a year.
- Initially worked in SD-WAN team implementing features like Zero Touch Deployment and bug fixes for SD-WAN Enterprise Edition. I worked with Golang for this feature.
- Later, I worked on implementing a service called Resource Provider, which acts as a bridge between Citrix Cloud and SD-WAN orchestrator.
- Contributed to a company level custom react components library called RDX.js
- Skills used: JavaScript ES6, Node.js, PostgreSQL and React.

## SKILLS

- Python (High)
- JavaScript (High)
- Go (Mid-level)
- AWS cloud(High)
- PostgreSQL, MongoDB, Redis
- Docker, Infra as a Code
- JIRA & Git
- REST API & Protocol Buffers

## FRAMEWORKS

- Django
- Node.js
- Express.js
- React.js
- Terraform

## AWARDS
